

MARTHA WUYA KOROMA

Clinical Research & Regulatory Science

Berlin, Germany | [linkedin.com/in/martha-koroma-67a28b191](https://www.linkedin.com/in/martha-koroma-67a28b191) | ORCID: 0000-0003-4152-3863

Clinical Research Portfolio: cra.marthakoroma.com

PROFILE

Final-year MD candidate (all coursework and clinical practicals completed; final state examination and degree conferral November 2026) and published researcher combining clinical medicine, independent regulatory-governance analysis, and composite digital biomarker research design. Named International Research Collaborator on a 105-country study published in *The Lancet Psychiatry* (2025). Seven months of structured observation across an active Phase 3 clinical trial, covering site visit conduct, protocol deviation management, and ICH-GCP-aligned safety review. Independently designed and authored a composite digital biomarker index for neurodivergence in African women, grounded in circadian actigraphy research, cognitive performance testing literature, and clinical composite-index precedent (APACHE II, Charlson Comorbidity Index). Works at the intersection of clinical reasoning, data architecture, and regulatory science, with a long-term trajectory toward Medical Science Liaison and Medical Affairs leadership.

SKILLS

Clinical & Diagnostic: Patient documentation & clinical charting, diagnostic pattern recognition, clinical data interpretation

Clinical Research & Regulatory: ICH-GCP, protocol analysis, AE/SAE review & safety reporting, regulatory documentation, GDPR Art. 9 & EU MDR classification, research ethics

Data & Technical: Python (algorithm & scoring-engine design), SQL, Tableau, Excel (incl. pandas-based data cleaning), HTML/CSS/JavaScript, AWS (S3, EC2, cloud security fundamentals), cybersecurity fundamentals (Wireshark, Nmap, Linux)

Clinical Trial Systems: EDC: Medidata Rave, Castor, REDCap | CTMS: Medidata, Veeva

Research Methodology: Composite index design, actigraphy methodology (van Someren non-parametric methods), continuous performance testing (CPT) literature, cultural validity & cognitive interviewing frameworks

Languages: English (native) | Krio (native) | German (B2) | Ukrainian (B1) | French (A2)

RESEARCH EXPERIENCE

International Research Collaborator | Global Suicide Prevention Network / *The Lancet Psychiatry* | 2021 – 2024

- Named collaborator (1 of 56) on peer-reviewed publication: "Evaluating the global landscape of suicide helpline services: a global survey across 105 countries", *The Lancet Psychiatry*, 12, 100–110 (2025)
- Led data collection and quality assessment for four assigned countries in a 105-country global health study
- Contributed to assessment of service effectiveness and resilience indicators within the study's Bayesian statistical modelling framework

Phase 3 Clinical Trial Observer | Inductive Quotient, Remote | Mar 2025 – Sep 2025

- Observed qualification, initiation, and monitoring visits end to end across an active trial; built working knowledge of site visit structure, investigator qualification verification, and ISF/TMF filing requirements
- Tracked protocol deviation identification and CAPA documentation in real time; gained direct exposure to AE/SAE review, concomitant medication verification, and ICH-GCP data integrity practices

Independent Clinical Research Contributor | Self-directed, Berlin, Germany | May 2025 – Present

- Conduct protocol analyses and regulatory documentation reviews aligned with ICH-GCP standards, including independent governance and benefit-risk evaluations across major oncology and neurology trials
- Completed hands-on training in EDC (Medidata Rave, REDCap) and CTMS (Medidata, Veeva) through the Johns Hopkins Clinical Trial Operations specialisation (via Coursera)
- Publish analyses openly on Zenodo (ORCID-linked) to invite peer feedback

Founder, Original Research: Candidate Digital Biomarker Feasibility for Neurodivergence in African Women |

MetaVoxa Labs, Berlin, Germany | 2025 – Present

- Question: existing diagnostic instruments for neurodivergence show a structural blind spot for populations who mask symptoms through cultural, physiological, or infrastructural adaptation, producing false-negative presentations that current tools cannot distinguish from absence of symptoms
- Method: designed a three-layer composite scoring index (a cultural-infrastructure questionnaire, a physiological component from wrist-worn actigraphy, and a dynamic suppression component from self-report plus cognitive performance testing) weighted into a single composite score; coded the scoring engine in Python and the research infrastructure in HTML/CSS/JavaScript
- Grounded the methodology in circadian rhythm research (van Someren non-parametric methods for relative amplitude, interdaily stability, intradaily variability), continuous performance test literature (QbTest+ paradigm), and composite clinical index precedent (APACHE II, Charlson Comorbidity Index)
- Published full design rationale and process record on Zenodo (ORCID-linked); authored a GDPR/BDSG-aligned research protocol and consent framework for a pending 20-control validation pilot
- Scope: proposes a diagnostic pathway for a population under-served by existing instruments; population norm data and independent validation remain pending the planned pilot study

CLINICAL EXPERIENCE

Healthcare Assistant (Pflegekraft) | Vivantes Hauptstadtpflege, Berlin, Germany | Sep 2024 – Present

- Deliver direct patient care within a multidisciplinary team under German healthcare regulatory standards, maintaining precise clinical documentation in a high-volume inpatient environment
- Built hands-on understanding of patient eligibility criteria, protocol-level care requirements, and institutional compliance

INDEPENDENT RESEARCH & ANALYTICAL WRITING

Analytical papers examining structural governance questions in major clinical trials and regulatory decisions, anchored in ICH-GCP, ICH E6/E9, and FDA/EMA guidance, published openly on Zenodo (ORCID-linked):

- Aduhelm (aducanumab): analysis of the EMERGE/ENGAGE trial governance failure, proposing an Independent Evidence Integrity Unit framework for trial oversight
- KEYNOTE-991: analysis of the trial's futility-boundary design, proposing an adaptive conditional-power monitoring framework for futility decisions in immunotherapy trials
- Candidate Digital Biomarker Feasibility for Neurodivergence in African Women: Phase II site feasibility assessment with a site-selection and validation methodology for digital biomarker studies

EDUCATION

MD, Surgery Track | Horbachevsky Ternopil National Medical University, Ukraine | 2020 – Nov 2026

All coursework and clinical practicals completed. Final state examination and degree conferral November 2026.

- Continued studies remotely and via clinical placements in Germany following displacement due to the 2022 war in Ukraine

BSc Business Administration | LICCSAL Business College, Freetown, Sierra Leone | Oct 2019 – May 2023

GPA: 4.0 | Focus: Data Analysis, Project Management, Organisational Strategy

AP Research Programme | SABS: Senegal American Bilingual School, Dakar, Senegal | 2019 – 2020

- Published original quantitative research; completed ethics certification independently

PUBLICATIONS & RESEARCH

Peer-Reviewed Publication

Vaghela G, et al., & Global Suicide Prevention Network Collaborators (incl. Koroma M.W.). (2025). Evaluating the global landscape of suicide helpline services: a global survey across 105 countries. *The Lancet Psychiatry*, 12, 100–110.

Accepted for Publication

"Built for the Average: Recruitment and Retention Design for Populations Standard Protocols Exclude", *Clinical Researcher (ACRP)*, accepted September 2026, publication pending.

Preprint

"Designing from the Inside: A Design Rationale and Process Record for a Culture-Calibrated Digital Biomarker System for Adult ADHD Diagnosis", Zenodo, May 2026, ORCID-linked.

Intellectual Property (Named Inventor)

- GlacéGrip: Cooling Steering Wheel Sleeve. Gebrauchsmuster, DPMA, registered August 2026
- Digital Biomarker System for Culture-Calibrated ADHD Diagnosis. Gebrauchsmuster, DPMA, filed May 2026

FOUNDER & INDEPENDENT VENTURES

Founder | MetaVoxa, Berlin, Germany | 2023 – Present

- Founded and operate MetaVoxa, a digital health research and publishing platform with three arms (Press, Research, Labs), spanning GDPR-aligned health data governance, ethics-aligned cohort design, and public scientific writing

Founder | GlacéGrip, Berlin, Germany | 2026 – Present

- Designed a cooling steering wheel sleeve (consumer product) for summer use, now registered with the DPMA
- Led full product redesign following first-prototype failure, incorporating market research, competitive analysis, supplier sourcing, and independent financial modelling
- Independently researched the German non-dilutive funding landscape to inform venture strategy

ADDITIONAL PROFESSIONAL EXPERIENCE

Public Diplomacy & Cultural Affairs Intern | Embassy of the Republic of Sierra Leone, Berlin | 2022 – 2023

- Managed official correspondence, briefing summaries, and formal records; supported senior staff navigating German legal and administrative frameworks

Diplomatic Aide & Strategic Assistant | Office of the Ambassador, Republic of Sierra Leone | 2018 – 2020

- Prepared briefing files and maintained confidential records across high-level meetings, state functions, and diplomatic receptions in multiple countries

CERTIFICATIONS & TRAINING

Clinical Research: Good Clinical Practice, Novartis / Coursera, 2025 · ICH E6(R3) Principles for Good Clinical Practice · Clinical Trial Operations, Johns Hopkins University (via Coursera), 2025 (EDC/CTMS: Medidata Rave, REDCap, Veeva) · Drug Development & Pharmacoepidemiology, Johns Hopkins University (via Coursera), 2025 · Data Management for Clinical Research, Vanderbilt University (via Coursera), 2025 · Regulatory Compliance, University of Pennsylvania (via Coursera), 2025 · Drug Development & Product Management, UC San Diego (via Coursera), 2025

Leadership & Strategy: McKinsey Forward Programme, 2026

Additional: Google Data Analytics Professional Certificate, 2025 · AWS Training & Certification, 2025 · Cybersecurity certificate, Careerera, 2023–2024

PROFESSIONAL AFFILIATIONS

ACRP, Association of Clinical Research Professionals (Member) | EMSA, European Medical Students' Association (Student Member) | HIMSS, Healthcare Information and Management Systems Society (Student Member) | FAMSA, Federation of African Medical Students' Associations (Student Member) | Global Suicide Prevention Network (International Collaborator)
